### **REASONS FOR ALLOWANCE**

This Office Action is responsive to Applicant's Amendment and Remarks, filed 29 Jun 2009, in which claims 1 and 5-11 are amended to change the scope and breadth of the claim and claims 4 and 15 are canceled.

This application is the national stage entry of PCT/JP04/05760, filed 22 Apr 2004; and claims benefit of foreign priority document JAPAN 2003-119710, filed 24 Apr 2003. Currently an English language translation of this foreign priority document has not been made of the record.

Claims 1, 2 and 5-13 are pending in the current application. Claims 5 and 7-11, previously withdrawn as being drawn to non-elected species, are rejoined as detailed in the Office Action mailed 31 Mar 2009. Claims 1, 2 and 5-13 are allowed.

The following is an examiner's statement of reasons for allowance:

#### ***Rejections Withdrawn***

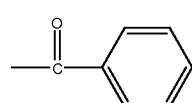

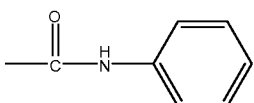

Applicant's Amendment, filed 29 Jun 2009, with respect to claims 1, 2, 4-13 rejected under 35 U.S.C. 112, first paragraph as not being enabled for the full scope of the claim has been fully considered and is persuasive, as the specification is enabled for the full scope of amended claim 1 and claim 4 is canceled.

This rejection has been **withdrawn**.

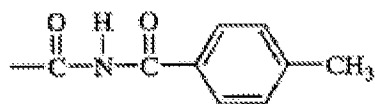

Applicant's Amendment, filed 29 Jun 2009, with respect to claims 5-11 rejected under 35 U.S.C. 112, second paragraph, as being indefinite has been fully considered and is persuasive, as claims 5-8 do not recite the atomic group using an open transitional phrase and claims 9-11 finds sufficient antecedent basis in claim 1 as amended.

This rejection has been **withdrawn**.

The instant invention as claimed is not taught or fairly suggested by the prior art. The closest prior art is Acemoglu et al. (Chirality, 1998, 10, p294–306, of record) in view of Okamoto et al. (Bull. Chem. Soc. Jpn. 1990, 63, 955-957, of record) as detailed in the Office Action mailed 9/22/08. Acemoglu et al. teaches a separating agent for enantiomeric isomers comprising cellulose substituted with a combination of benzoate,

 , and aryl carbamate,  , groups. Okamoto et al. teaches the chiral recognition interaction of the phenylcarbamates of cellulose.

It would not have been obvious to one of ordinary skill in the art at the time of the invention to combine Acemoglu et al. in view of Okamoto et al. to result in the connectivity of the instant formulas (I) and (IV)-(VIII), such as

. Applicant's Remarks, filed 22 Dec 2008 are persuasive regarding Acemoglu et al. in view of Okamoto et al. failing to teach any equivalence between the carbonyl functional group, a carbamate functional group, and general

Art Unit: 1623

formula (I) of the instant invention. Further, Okamoto et al. suggests the criticality of the functional group of Okamoto et al. based on the carbamate group (page 956, left column paragraph 1 and right column, figure 2). Therefore a polysaccharide substituted with a group represented by general formula (I) of the instant invention, connected by a different functional group, would not have been obvious to one of ordinary skill in that art by the combination of Acemoglu et al. in view of Okamoto et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Claims 1, 2 and 5-13 are in condition for allowance.
